Hiring Team
AMC Planning Solutions
Suite 2, 45 Maitland Street
Branxton NSW 2335

Dear Hiring Team,

Re: Draftsperson position

I am applying for the Draftsperson position advertised by AMC Planning Solutions. I recently completed an Advanced Diploma of Civil Construction Design in Australia and hold a Bachelor of Science in Civil Engineering. The opportunity is well aligned with my goal of developing practical drafting capability under experienced staff while contributing reliable documentation and careful project support.

During my Advanced Diploma, I prepared and reviewed technical drawings using AutoCAD and Civil 3D and developed civil design documentation covering road geometry, earthworks, pavement systems and stormwater drainage. My AutoCAD, Civil 3D and Revit experience is academic rather than commercial production experience, so I am specifically seeking an entry-level role where I can continue learning and apply those foundations accurately.

My earlier construction work also gives me a practical view of how drawings are used on site. At JustBuilt, I reviewed structural and architectural drawings, checked work against project requirements and coordinated the daily activities of 10-15 workers. At Grand Travaux, I supported site inspections, quality checks and progress and material documentation. These experiences strengthened my attention to detail, organisation and communication with engineers, suppliers, subcontractors and clients.

AMC Planning Solutions' residential and commercial drafting, planning and approval-coordination work is particularly relevant to my interest in documentation and constructability. I am based in Melton, Victoria and would welcome the opportunity to discuss relocation to the Branxton area. I hold a White Card, an Australian driver's licence with reliable transport, and full working rights under a Subclass 485 visa until December 2027.

Thank you for considering my application. I would welcome the opportunity to discuss how my civil design education, practical construction background and willingness to learn could support your team.

Kind regards,

Marc Darenz Masarate
