Full working rights to December 2027

13 September 2026

Hiring Team

Breese Pitt Dixon
1/19 Cato Street
Hawthorn East VIC 3123

Expression of interest - graduate civil engineering

Dear Hiring Team,

I am writing to ask whether Breese Pitt Dixon has any suitable paid graduate civil engineering opportunities. I understand that this is a speculative employment enquiry and that I am not applying for a confirmed advertised vacancy. I am particularly interested in your land development work across roads, drainage, sewers, water mains, wetlands and construction delivery.

I completed an Australian Advanced Diploma of Civil Construction Design in February 2026, following a Bachelor of Science in Civil Engineering completed in 2019. Through the diploma I prepared and reviewed technical drawings using AutoCAD and Civil 3D and studied road geometry, earthworks, pavement systems and stormwater drainage. This is academic design-software experience rather than commercial production experience, and I am keen to develop it under experienced civil engineers and designers.

My earlier construction experience involved supporting a community hall renovation and residential subdivision finishing works in the Philippines. I coordinated daily site activities, reviewed structural and architectural drawings, completed inspections and quality checks, tracked materials and progress, prepared site records, and worked with engineers, subcontractors and suppliers. These experiences would help me contribute practically while learning BPD's land development standards, systems and project processes.

I am based in Melton, Victoria and hold an Australian driver's licence, reliable transport and a White Card. I have full working rights in Australia under a Subclass 485 visa until December 2027.

Thank you for considering my enquiry. I would welcome the opportunity to discuss whether my civil construction background and current Australian design training could suit supervised graduate work with your team.

Kind regards,

Marc Darenz Masarate
