Chempro Careers Molendinar, Queensland

Dear Chempro Careers Team,

I am applying for the Junior Drafter position based in Molendinar. I recently completed an Advanced Diploma of Civil Construction Design in Australia and have academic experience preparing and reviewing technical drawings using AutoCAD and Civil 3D. The opportunity to combine site visits, accurate measurements and floor-plan documentation is a practical next step for me.

My earlier construction experience in the Philippines involved reviewing structural and architectural drawings, conducting site and quality inspections, maintaining progress records and communicating with clients, engineers and site teams. This experience taught me to check details carefully, document information clearly and communicate professionally while work is underway.

I understand that the role involves regular travel across Queensland and New South Wales, independent scheduling and learning Chempro's planogramming software. I hold an Australian driver's licence and have my own transport. I am currently based in Melton, Victoria and would be happy to discuss relocation to the Gold Coast. I have full working rights on a Subclass 485 visa until December 2027.

I would welcome the opportunity to bring my drafting education, site awareness and careful approach to documentation to Chempro's store-planning work.

Kind regards,

Marc Darenz Masarate
