Kingston QLD 4114

Dear Careers Team,

**Re: Junior Estimator position**

I am applying for the Junior Estimator position at Star Scaffolds. I hold a Bachelor of Science in Civil Engineering and recently completed an Advanced Diploma of Civil Construction Design in Australia. The entry-level position and its structured training are a strong match for my construction coordination, drawing review and documentation background.

At JustBuilt, I reviewed structural and architectural drawings, checked work against project requirements and coordinated the daily activities of 10-15 workers. At Grand Travaux, I tracked procurement and materials and prepared site reports, material records and progress documentation. This experience gave me a practical understanding of construction information, accurate records and communication with engineers, subcontractors and suppliers.

My Advanced Diploma also included preparing and reviewing technical drawings using AutoCAD and Civil 3D. My estimating experience is not yet commercial, but I can bring careful plan interpretation, organised data handling, construction knowledge and a genuine willingness to learn quotation and estimating processes under your Senior Estimator.

I am particularly interested in Star Scaffolds' engineering and design work, where estimators and drafters support project-specific access solutions and costings. I am based in Melton, Victoria and would welcome a discussion about relocation to Kingston. I hold a White Card, an Australian driver's licence with reliable transport, and full working rights under a Subclass 485 visa until December 2027.

Thank you for considering my application. I would welcome the opportunity to discuss how I could support your estimating team while developing my skills.

Kind regards,

**Marc Darenz Masarate**
