Application - Graduate Program

Preferred office: Central Victoria **Preferred discipline:** Civil Engineering

I am applying to the Westera Partners Graduate Program in civil engineering. I completed an Advanced Diploma of Civil Construction Design in Australia in February 2026 and hold a Bachelor of Science in Civil Engineering. My preferred office is Central Victoria and my preferred discipline is civil engineering.

Your civil work in land subdivisions, local government infrastructure planning and design, stormwater management and erosion and sediment control is close to what my diploma covered. My studies dealt with road geometry, earthworks, pavement systems and stormwater drainage, and I prepared and reviewed technical drawings in AutoCAD and Civil 3D against Australian Standards, applying DBYD procedures and taking account of existing services and site constraints. I should be clear that this design and drafting work comes from coursework rather than a commercial office, which is why a graduate position with mentoring is what I am looking for.

What I bring beside the study is time on site. At JustBuilt I coordinated the daily activities of 10 to 15 workers on a community hall renovation and reviewed structural and architectural drawings against project requirements to reduce errors and rework. At Grand Travaux I worked on residential subdivision finishing works, assisting with inspections and quality checks and preparing site, material and progress records. Having seen what happens on site when a drawing is unclear or does not match what is buildable, I expect to be more useful in a design team than my drafting hours alone would suggest.

The four-year structure of your program and the mentoring from senior engineers are a large part of the appeal. I would also want to confirm with you how my overseas bachelor's degree is assessed for the professional accreditation pathway, rather than assume it presents no question.

I am based in Melton and open to discussing what working from your Central Victoria office would involve. I hold a White Card, an Australian driver's licence and reliable transport, a Working with Children Check, and full working rights under a Subclass 485 visa until December 2027. I can provide my academic transcript on request.

Thank you for considering my application. I would welcome the chance to discuss it with you.

Yours sincerely,

Marc Darenz Masarate
