Fortitude Valley QLD 4006

Application - Graduate Civil Engineer

Dear Careers Team,

I am applying for the Graduate Civil Engineer position advertised on Witthoft Engineering's careers page. The opportunity to assist senior engineers with civil design deliverables, site inspections and project documentation in water and wastewater infrastructure strongly matches the direction I am working towards.

I hold a Bachelor of Science in Civil Engineering and completed an Australian Advanced Diploma of Civil Construction Design in February 2026. Through the diploma I prepared and reviewed technical drawings using AutoCAD and Civil 3D and studied road geometry, earthworks, pavement systems and stormwater drainage. This is academic design and software experience rather than commercial water-infrastructure design experience. I would value Witthoft's close technical mentoring while developing capability in hydraulic modelling, water and sewer design, GIS and local Queensland standards.

My earlier construction experience in the Philippines involved supporting a community hall renovation and residential subdivision finishing works. I reviewed structural and architectural drawings, completed inspections and quality checks, tracked materials and progress, prepared site records, and coordinated with engineers, subcontractors and suppliers. These duties would help me contribute to routine site inspections, status reporting, design coordination and project support from the outset.

I am based in Melton, Victoria and would welcome a discussion about relocation to Brisbane and interstate site travel without assuming any arrangements. I hold an Australian driver's licence, reliable transport and a White Card. I have full working rights in Australia under a Subclass 485 visa until December 2027.

Thank you for considering my application. I would welcome the opportunity to discuss how my practical construction background and recent Australian civil design training could contribute to Witthoft Engineering's graduate civil team.

Kind regards,

Marc Darenz Masarate
